

Winter 2015

The Izaak Walton League of America

MINNESOTA

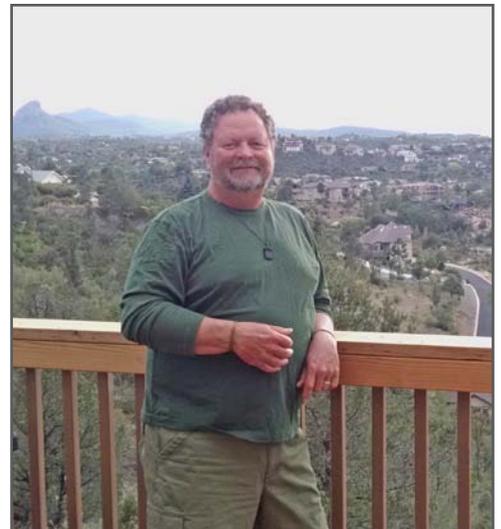

# WALTONIAN

## President's Letter - *by President Barry Drazkowski*

Welcome to winter fellow Ikes. For some of us it's been heavy rain for some wet snow, but for all we know it is that time of year. As I write this letter, the Paris Climate Summit, COP21 is ongoing, and when you read this we'll have the outcomes of those talks. We all hope for a thoughtful and aggressive agreement, especially by the United States. As one of the wealthiest and greatest carbon contributing countries, we have a moral and ethical responsibility to lead the world in aggressive carbon reduction actions. So, as I near the end of my tenure as Division President, I thought it important to finally make some comment on this very important subject, especially since it is the single most important driver for the future of Minnesota's remaining resources.

As I've considered climate change in both my professional and personal life, I've wondered at the meaning of a 2-4 degree change in temperature and a shift in our precipitation patterns. There are a great deal of papers, websites, climatologists, and others that have extensive resources on these topics. They are not subject to debate, they are our new reality. As I try to bring meaning to all this I find that thinking about temperature and precipitation change is most meaningful, at least when trying to understand their impact on habitat, water, wetlands, fisheries, and wildlife, when I put them in the context of aridity. Aridity is the drying of the land due to increased solar energy (temperature) and a change in the pattern of precipitation, but not a compensating increase in the amount of precipitation and soil infiltration. There is a very useful and credible web tool that anyone can access to understand your local or regional effects of climate change. You can look at temp, precipitation, or a variety of aridity metrics. The site is **Climatewizard.org** and was created and is maintained by scientists within the Nature Conservancy. So, when we look at aridity we realize that the effects in our region are significant, with soil drying as much as a 15%. This results in increased habitat vulnerability as species life requirements are threatened, or conditions become much more suitable for invasive species, whether those are insects or plants. We realize that our surface and ground water are even more at risk than at present with land use changes and liberalizing wetland policies. However, as easy as it is to sink into the despair of climate change, I think it more important to look to what we can do. The days of reversing it have long past, and as we enter a new day of increasing carbon atmospheric concentrations exceeding 400 parts per million, we must look to aggressive actions and policies that mitigate the changes we are already seeing.

Minnesota Ikes have prioritized our actions to focus on energy, water, ground water, wetlands, invasive species, and the Mississippi river. We are looking at actions and engagement that we as individuals, chapters, and the Division can take. We passed a resolution at all chapter houses will be 100% renewable within the next couple years. We have taken on the National Energy program and focusing its resources to help our chapters achieve that goal. We are working with members to help inform them on renewable energy options. You can, through your energy provider, elect to have a portion or all of your home energy come from renewable sources, typically wind. We have members working on community-based solar gardens, as well as those installing solar on their homes. We are heavily engaged in policies that affect surface and ground water. We have members directly engaged in State processes looking at policies affecting both these important resources. So, as easy as it is to slip into the doom and gloom of a changing climate and the increased risks to our natural resources, we should all take heart in the fact that there are significant actions we all can take and we are taking. I am so proud of what we are doing in Minnesota. I thank each and every one of you for your commitment to change, to action, and your belief in the Minnesota Izaak Walton League as one way for us to mitigate the effects of climate change.

Minnesota Division President Barry Drazkowski.

# Ikes Jump In to Stop PolyMet!

by *Conservation Issues Chair Don Arnosti*

Governor Dayton says that the decision to permit - OR NOT - the PolyMet sulfide ore mine in northern Minnesota will be the most significant decision of his two terms in office. The Governor understands the long-lasting consequences of allowing the mine to destroy up to 12 square miles of outstandingly pristine wetlands at the headwaters of the St. Louis River, and to store the acid draining mine waste in a manner that could pollute both the Boundary Waters Wilderness and Lake Superior, for centuries to come.

The Question is, "Can the Governor bring himself to do the right thing?"

For this reason, hundreds of Ikes have been contacting him, asking him to reject the PolyMet EIS and mine plan. Volunteers are reaching out to members across the state. The National Ikes have sent out an alert across the nation to rally all Ikes to contact the Minnesota DNR objecting to the poor EIS analysis, which ignores the opportunity to examine alternatives which would do far less environmental damage.

Twenty years' of jobs are not worth hundreds of years of pollution. Call 1(800)-657-3717, toll-free, 24 hours a day and leave a message for **Governor Dayton**.

Visit our Division website, [www.minnesotaikes.org](http://www.minnesotaikes.org), on the "Stop PolyMet" page, for more information and links to comment to the Army Corps of Engineers on the wetlands destruction, and the US Forest Service, on a land exchange that PolyMet needs to move forward.

Ikes together with our many Friends can make a difference. **Please act today!**

*Don Arnosti enjoying a hike at Nortwoods Audubon over the Fall Gathering and BOD weekend. Photo by Terry Houle.*

## NOTES FROM THE FALL GATHERING & BOARD OF DIRECTORS' 2015

by *Conservation Issues Chair Don Arnosti*

It was All Hallows' Eve, and a small, but committed group of Ikes gathered at the Audubon Center of the North Woods on the shores of Grindstone Lake for the Fall Board meeting. As we discussed the recent decision of the national Ikes to wind down the energy program, the unusually warm weather (which we were admittedly enjoying) only served to underscore the need for action when it comes to moderating our rapidly changing climate.

The Board voted to accept the challenge of continuing our commitment to addressing Global Warming by implementing energy conservation and renewable energy at a chapter and individual level. Eric Jensen, whose job in the Midwest office ended on November 30th, will be working with Don Arnosti to assist chapters in moving forward in this manner using a small grant, which was transferred from national. Owatonna and Wes Libbey chapters are first on their work list, with other chapters to follow. We hope to present a workshop at next summer's annual convention (Stevens Point, WI) sharing our successes and lessons.

An in-depth presentation and discussion of Green Step Cities was provided by Phillip Muessig, and how this program, which we Ikes have supported since the beginning, has enrolled 88 cities across the state in a process of "continual greening". **Continued on page 3.**

# Fossil Fuels in Minnesota

By Terry Houle

President Obama finally said NO to the Keystone XL (KXL) pipeline on November 6, 2015. Obama indicated the State Department had determined it would not serve the national interests. It was to run from the Canadian Border to the Gulf of Mexico. The President indicated we would still rely on oil and gas for a long time. But we needed to transition to clean energy economy.

The President went on to say; “Because ultimately, if we’re going to prevent large parts of this Earth from becoming not only inhospitable but uninhabitable in our lifetimes, we’re going to have to keep some fossil fuels in the ground rather than burn them and release more dangerous pollution into the sky.”

That is not to say the fight is over for Minnesota. There is still a lawsuit pending in federal court on an Alberta Clipper (aka Line 67) that was filed by the Sierra Club, National Wildlife Federation and others. That decision is still pending

There is also a proposed Sandpiper line that would bring Bakken shale oil from North Dakota to Duluth/Superior area. The Enbridge preferred route is through northern Minnesota. It would run near Grand Forks, Clearbrook, and Park Rapids and across many sensitive areas in Northern Minnesota. This issue is still pending in the Minnesota Supreme Court.

One other is called a Line 3 Replacement project with a rerouting of an old line and to roughly follow the Sandpiper proposed corridor. The original line dates back to the 1960’s and carries tar sands from Alberta, Canada to Superior.

So the fight is not over with Canadian company Enbridge Energy to transport dirty fuels across Minnesota.

Also some say there are too many oil trains going through our town carrying this dangerous product. They feel it is better to go through pipelines but the fact is that both will be needed in the future.

The real solution is we have to use less and keep it in the ground.

For more information about this topic to Honor the Earth at [www.honorearth.org/pipelines](http://www.honorearth.org/pipelines).

~

## Correction for Fall 2015 Waltonian:

There were two more members from MN at Pierre. Alexis Weinzetl and Gavin Schwartz are Owatonna members and took part in the youth convention.

*New Communications Committee Chair Terry Houle, hugging a deserving tree at Northwoods Audubon. Photo by Dpm Arnosti.*

## Fall Meeting Notes continued from page 2.

The program challenges cities to improve their environmental performance, provides assistance and “best practices” to achieve their goals, and provides them recognition. Mark Owens and Jill Crafton will be our representatives to the program, moving forward.

We discussed mining and wetlands, the Great Lakes, fracking and groundwater and many other issues. The Mississippi River watershed initiative has been circulating in draft form. A meeting is planned with other states for late winter. Terry Houle told us how to more effectively use social media to get our message out into society. He asks all who use Facebook to “Like” each chapters’ and the Division’s home pages, so that we build a bigger network.

Finally, our tiny budget was discussed, and the need for us to each dig a little deeper so that we can support our growing programs and activities.

**If you’ve not yet replied to President Drazkowski’s Appeal this Fall, please give generously!**

## Kristi Harrington Loftis Memorial Project Completed

The first “Tiny House” at Deep Portage, one of Kristi Harrington Loftis’ favorite projects, was recently completed at Deep Portage, thanks to the memorial contributions made to the Cass County Chapter of the Izaak Walton League and to the Deep Portage Foundation in Kristi’s honor. The tiny house, well insulated and with metal roof and siding, is mounted on a wheeled metal frame and, hence, is completely portable. It measures 8’ X 20’, including a cozy front porch with room enough for a rocking chair. Electricity is provided by a roof mounted solar panel coupled with a lithium ion battery for power when the sun isn’t shining; heat is provided by a small propane stove. Located in a forest clearing just off the firing range road, it is currently being occupied by Brendan Grant, artist in residence, who is now offering classes in baking pizza and bread in the outdoor wood fired brick oven he finished constructing earlier this year.

*The Kristi Harrington Loftis Memorial Tiny House at Deep Portage Learning Center at Hackensack, MN.*

The family, Deep Portage and the Cass County Ikes thank all for their memorial contributions and invite you to come have a look at the Kristi Memorial Tiny House.

## My Fly-In to Washington DC to Support Clean Water Rule

*by Natalie Warren Minnesota Valley Chapter*

In mid-October I had the privilege of representing the Izaak Walton League in Washington D.C. Myself and other Ikes from around the country gathered at the Trout Unlimited headquarters on a Tuesday night to learn about the Clean Water Rule (CWR) in preparation for meetings with our state senators and representatives. I was aware that the Clean Water Rule would further define which waters are and are not protected under the Clean Water Act (CWA), and would strengthen the CWA to include protected headwaters streams, but I was by no means an expert on the issue. I quickly realized that the Izaak Walton League had not flown me to Washington D.C. to explain the nitty gritty details to my senators. They brought me there to share my love of water and to strengthen the hard facts with real life stories.

Water--clean water--is my passion. Originally from Miami, FL, I fell in love with Minnesota through a wilderness adventure camp that introduced me to the BWCA and beyond to paddle whitewater rivers in Ontario and arctic rivers in the Canadian tundra. I have had the rare pleasure of drinking directly from a river without having to filter my water. In 2011, I became one of the first two women to paddle over 2,000 miles from Minneapolis to Hudson Bay, recreating Eric Severeid’s route from *Canoeing with the Cree*. Two years ago I paddled the length of the Mississippi River which furthered my understanding of the American economy in relation to our water resources. Needless to say, my on-water experiences have shown me the breadth of our consumption and the need to protect our most vital resource: water.

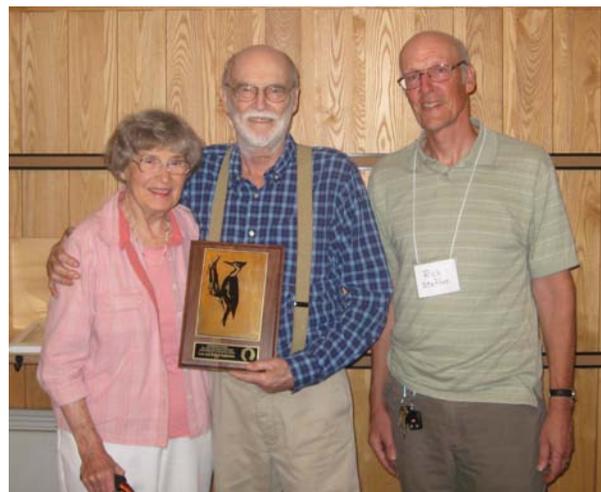

Lucky for the Minnesota team our job was easier than other fly-in participants. Senator Franken and Amy Klobuchar both support the Clean Water Rule and were happy to hear from fellow conservationists. In our meetings with the Senators and their staff, two women from Minnesota and me tag teamed offering facts in support of the CWR interlaced with our personal feel-good stories to bring the message home. While it felt like we were really making a difference on The Hill, the Farm Bureau was out in full force lobbying against the Clean Water Rule (even though farmers are exempt from the CWR). I felt the weight of the ‘opposition’ in our meetings and grew frustrated with the amount of misinformation supplied by opponents of the CWR.

It will be a slow process to improve protections of our nation’s waterways but there are groups like the Izaak Walton League who are patiently and passionately representing conservationists nationwide. While the Clean Water Rule sits in the courts it is important that our Minnesota Senators stay strong and prevent any harmful riders from passing in Congress. My experience in Washington DC empowered me to learn more about the Clean Water Act and understand the impact of communicating with our Senators and their staff, whether it is in person or a letter. It does make a difference!

## Len and Bethel Anderson *By Dave Zentner*

September 2<sup>nd</sup> 2015. Hartley Nature Center in Duluth is the location of the W.J. McCabe Izaak Walton League monthly meetings. It is 7p.m., the meeting room is full and the attendees are busy chatting. There is a buzz in the room. Among the attendees are Len and Bethel Anderson. Len and Bethel are long time members of the McCabe Ikes. They are also members of many other colleague conservation groups. Len and Bethel received the MN Division Breckenridge Award, (recognition of environmental education efforts) last spring at the Minnesota Division Annual meeting. McCabe Chapter President Rich Staffon has arranged to honor Len and Bethel among a gathering of their home chapters members and friends.

Len and Bethel are impeccably qualified to be honored. Bethel is a retired nurse. She has been active for decades on a broad range of public policy issues related to the environment. One of her key interest' is to focus on mercury levels in NE MN. Levels high enough to require public health advisories.

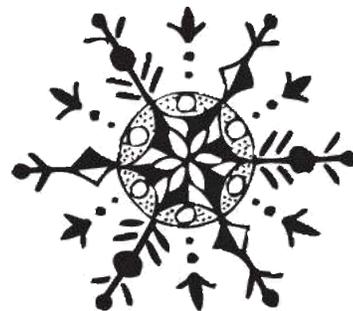

*McCabe Chapter President Rich Staffon (right) with Bethel & Len Anderson and their Dr. Walter J. Breckenridge Award.*

Len is a retired science teacher at Cloquet H.S. Len joins Bethel in her concern about mercury in the environment, as well as many other issues. Len was instrumental in a rally at Cloquet H.S. on the very first Earth Day. And he has nurtured the Cloquet H.S. Environmental club since its inception until his retirement.

**Continued on page 5.**

## A BIG THANK YOU TO ALL OF OUR DONORS AND VOLUNTEERS

**who have contributed to our efforts in the past 12 months. We know that there are a lot of pressures and worthwhile causes that your time and money could support, making your contributions to our efforts especially valuable to us. We cannot thank you enough!**

Keith & Anita Anderson, Paul & Carol Anderson, James Anderson, Karin Anderson, Mary Ann Anderson, Paul Anderson, Susan Anderson, Gordon Andersson, Craig Andresen, Susan Arndt, Carol Arnosti, Constance Arnosti, David & Regula Arnosti, Nancy Arnosti, Doug Agustin, Audubon Chapter of Minneapolis, Austin Chapter IWLA, Karen & Ed Zentner Bacig, Katherine Baird, Karl Bakken, Lee Barthel, John & Diane Bazey, Bill & Terry Berg, Jeff Bircherm & Gretchen Mehmel, Richard & Kathleen Blake, Bluegreen Alliance, Howard & Margot Brockman, Char Brooker & Gene Mamenga, Dick & Vera Brown, Bush Lake Chapter IWLA, Brian Buxton, Robert & Kathleen Carlson, Joy Cedarleaf, Judy Chucker, Beth & Pat Ciernia, David Cole, Jill Crafton, Raymond & Mara Croissant, Marcia & Neil Dahlquist, Stan & Carol Danielson, Scot Dauner, Scot Dauner, Maureen Davis, Richard Dendinger, Bruce & Judith Derauf, Brad & Sue Doeden, Barry & Tammy Drazkowski, Bill Droessler, Earl & Margaret Eberhardt, John Emery, Paul Erdmann, Jack Fitzgerald, Jerry Fitzgerald, Marcie Forsberg, Chris Frethem, James Fritsch, John & Gail Gislason, Robert Goetz, Hannah Goodrich, Bill & Teresa Grant, Janet & John Green, Carol & Bill Gregory, James Halverson, Dorothy Harrington, Ann Harvell & Don McClung, Jeff Hassing, Katherine Healy, Jeffrey Hedtke, Charles Heimenz, Judith Helgen, John Helland, Bill & Nancy Henke, Julie & John Henricksson, Terrill Hepworth, Stewart Hofland, Terry Houle, Kate Hunt & Howard Miller, Jim Isensee & Ann Vogel, Don Janes, Joel Jacobs, Susu Jeffrey, Richard Jensen, Timothy Johnson, Matt & Lisa Jones, Jostens, Martin & Esther Kellogg, Amber Setter & Todd Kerkow, Jim Larson, Al Layman, Sue & Tom Leaf, Stan Ledebuhr, Barb Lindeke, John & Patricia Lindholm, John Lindstrom, Perry & Shirley Loegering, Paul Lukens, Terrance Mackin, Caroline Malde, Howard & Lynn Markus, Bruce McBeath, John Mooty, Patricia Mullen, Cora Ellenson- Myers, Gwen & Mason Myers, New Ulm Chapter IWLA, Richard Newmark, Tim and Susan Nixon, Thomas Nystrom, Pat & Stacie O'Leary, Todd & Andrea Olson, Owatonna Chapter IWLA, Mark & Barb Owens, John & Linda Peck, Bruce & Karen Philipson, Richard Piepgras, Jerry Raedeke, Leo Reding, Tim & Danelle Reid, John & Judy Reiter, Daryl Sanderson, Mary Shedd & Steven Wilson, Arlen & Mary Chamber, Bill Schnell, Patricia Schrantz, Michelle Schroeder, Gary & Cherry Schwartz, Ron Scripture, Walter Seibert, Margaret Seitz, Kathleen Sekhon, Barbara & Julian Sellers, Laura Silver, Erika & Paul Sitz, Kirby & Marcia Smith, Peter Sorensen, Robert Stegmier, Craig & Sandy Sterle, Steven C. # W. J. McCabe Chapter

by Dave Zentner

Duluth is a busy little city. A good deal of its activity is centered on the regions natural resources. While things have changed, as the city has become much more diversified, since the early days of mining, shipping and logging, natural resources continue to be a significant player in Duluth and the surrounding region. McCabe Ikes are in the middle of much of the action. Led by retired DNR Area Wildlife Supervisor Rich Staffon, McCabe Ikes have provided leadership and advocacy in a variety of ways.

In 2015 Duluth Ikes played significant roles that reflect the IWLA mission. The McCabe chapter was well represented at all the MN DNR Lake Superior Fisheries Management Plan meetings. Duluth Ikes brought together neighbors and played an instrumental role in the development of a master plan for Hartley Park and Nature Center in 2014 and expanded that to engage in community-wide discussions on Mayor's vision for parks and trails city-wide. Led by Ike Connie Moeller, over 150 people met in June to share their passion and vision for Duluth's green space moving forward.

McCabe Ikes helped to work out an environmentally acceptable plan for equestrian trails in Duluth, and is now engaged in discussions regarding environmentally acceptable ATV use. McCabe Ikes have continued making their presence on proposed metals mines including open pit copper /nickel mining in NE MN. The Duluth Chapter along with the Minnesota Division has been working in partnership with other groups that oppose the Poly Met project and has partnered with The Campaign to Save the Boundary Waters a coalition dedicated to preventing this type of mining and the associated drainage into the BW-CAW, Voyageurs National Park and other precious places.

The McCabe Chapter has dedicated itself to becoming a grass roots community based chapter that can be relied on to provide objective information on complex issues, encourage dialogue, foster informed decision making, support sustainability and bio-diversity in their region and the state.

This chapter benefits by excellent leadership, and as a result has a growing membership, increased participation and many promising future leaders. Congratulations to Rich Staffon for all of his able leadership and the McCabe Ikes!

Bob & Pat Tammen receiving a Volunteer Award from the McCabe Chapter.

They were also honored by the Minnesota Pollution Control Agency (MPCA) for their tireless advocacy on behalf of the environment.

The MPCA put together a short video in their honor: <https://youtu.be/Own0bsHQcn4>.

~

## **Len & Bethel Anderson continued from page 5.**

They both focus a lot of their time on the St. Louis River watershed. Their lives reflect their values. They do maple syrup collecting in the spring, garden, harvest wild rice, and unceasingly appear on behalf of the earth and all of us in matters of natural resources public policy.

Just for a moment, pretend that you were at Hartley Nature Center on September 2<sup>nd</sup>. Remember, the Anderson Family gathered around Len and Bethel? Remember the looks of love and admiration beamed toward Len and Bethel by the kids and grand-kids? And, as we all saw, those looks of appreciation did not end with the Anderson Family. There were beams of thank-you in the eyes of a room full of friends. Congratulations to two very fine Ikes.

# WINTER GATHERING AND BOARD OF DIRECTORS' MEETING

January 29 - 30, 2016 - Bloomington, MN

**All are Welcome to Attend!**

## January 29 - Evening

7:00 - 9:30 PM

**Reception** at the Minnesota Valley Chapter, 6601 Auto Club Rd., Bloomington, MN 55438, 952-944-1423.

Evening Program: **Will Dilg and the Founding of the Izaak Walton League** presented by Mike Kennedy of the Will Dilg Chapter. \*Suggested donation is \$10 per person at the door. See below for Saturday registration.

## January 30 - Saturday

REI Bloomington, 750 W American Blvd, 952-884-4315.

[Rei.com/stores/bloomington.htm](http://Rei.com/stores/bloomington.htm)

### Morning

9:00 Doors open/set up.

9:30 Minnesota Division Board of Directors' meeting

12-1 Working Lunch (pizza)

### Afternoon

1:00 **Upper Mississippi River Initiative:** Barry Drazkowski and Don Arnosti will preview and we IKEs brainstorm the **Upper Mississippi River Basin** Initiative that also involves the Izaak Walton League Divisions of Minnesota, Iowa, Wisconsin and Illinois. The aim of the UMR Initiative is to greatly reduce the nitrogen and sedimentation pollution in the Mississippi River and its tributaries.

2:30 **EIC Update** The Environmental Issues Committee reports on its activities in 2015 and goals for the 2016 legislative session.

4:00 Adjourn

## Saturday Evening

5:30 **Potluck Dinner** (provided by Bush Lake Chapter)

6:30 **Grassroots Organizing for Climate and Clean Energy** Presenters from Izaak Walton chapters and other organizations talk about grassroots projects to build community solar gardens and wind projects, oppose pipelines and oppose dangerous fossil fuel projects. The focus is on how to lead successful, local grassroots campaigns to reduce carbon emissions, protect natural resources and to create economic opportunities.

### Possible Accommodations:

**Four Points by Sheraton** Minneapolis Airport, 7745 Lyndale Avenue South, Richfield, MN 55423, (612) 861-1000, [www.fourpointsmiinneapolisairport.com](http://www.fourpointsmiinneapolisairport.com) - rates \$109 to \$159

**Super 8** Bloomington/Airport, 7800 2nd Avenue South, Bloomington, MN 55420, (952) 888-8800, [super8.com](http://super8.com) - rates from \$74

**Holiday Inn Express** Hotel & Suites, 1601 East American Blvd, Bloomington, 55425 1 (800) 315 2621, 952-854-1687, [mspbmi@ihg.com](mailto:mspbmi@ihg.com) - rates from \$124

### Registration Form - Winter 2015

Name(s) \_\_\_\_\_

Address: \_\_\_\_\_

City: \_\_\_\_\_ State: \_\_\_\_\_ Zip: \_\_\_\_\_

E-mail: \_\_\_\_\_

Registration Fee: \$25 per person X \_\_\_\_\_ = \_\_\_\_\_ enclosed.

Make Checks payable: Minnesota Division IWLA, 2233 University Ave.W, Ste. 339, St. Paul, MN 55114.

Online registration available at [minnesotaiques.org/izaak/meetings.html](http://minnesotaiques.org/izaak/meetings.html).
